PROFESSIONAL SUMMARY

Software Developer with 1 year of hands-on experience in developing web and mobile applications through professional and academic projects. Experienced in web development using **PHP, CodeIgniter 4, Laravel, HTML, CSS, JavaScript, and MySQL**, with a strong interest in fullstack development and system analysis. Experienced in developing information systems and marketplace applications, including implementing features based on user and business requirements. Familiar with **Git and GitHub** for version control and team collaboration, as well as **Agile methodologies for managing software development processes**. Adaptable, disciplined, and eager to learn new technologies while contributing effectively to development teams.

TECHNICAL SKILLS

- | | |
|--------------------------------|--|
| • Languages | : PHP, JavaScript, HTML, CSS, Java. |
| • Frameworks & Web Development | : CodeIgniter 4, Laravel, Bootstrap |
| • Database | : MySQL, Database Design |
| • Software Development | : Fullstack Web Development, Front-end Development, System Analysis, System Design, Responsive Web Design |
| • Tools & Workflow | : Git, GitHub, Documentation, Agile/Scrum, Visual Studio Code, Android Studio, Laragon, cPanel, Figma. |
| • Engineering Fundamentals | : UML, Use Case Diagram, Activity Diagram, ERD, Problem Solving, Software Testing, Debugging. |

SELECTED PROJECTS

- **Sistem Informasi Perpustakaan SMK Almunawwir IIBS** : Web-based library information system developed to support library operations while encouraging student reading interest through gamification. Developed core library features including member management, book collection management, borrowing, returning, fines, reporting, and user management. Implemented gamification elements including point rewards, quizzes, and leaderboards to increase student engagement in library activities. **Built using CodeIgniter 4 and MySQL.**
- **Ater-aterApp : Web and Android** marketplace application developed to support product discovery and digital purchasing. Implemented key features including product catalog, product purchasing, shopping cart, checkout, and order creation. Contributed to feature **development, integration, testing, and bug fixing as part of the development team.**
- **Sistem Persuratan Desa Pasirian** : Web-based village correspondence management system developed to support administrative processes in Desa Pasirian, Kabupaten Lumajang. Contributed as a **Frontend Developer** by implementing user interfaces using **HTML, CSS, JavaScript, and Laravel**. Developed responsive web pages based on provided designs and collaborated with the development team to integrate frontend components with backend functionality.

PROFESSIONAL EXPERIENCE

SMK AIMUNAWWIR IIBS

Web Developer / Fullstack Developer

Feb 2026 – Jul 2026

East Java, Indonesia

- Developed core library operations including member management, book collection management, borrowing, returning, fines, and reporting.
- Implemented gamification features including point rewards, quizzes, and leaderboards to encourage student engagement and reading activities.
- Managed **database** structures and implemented application functionality using **PHP and CodeIgniter 4.**
- Conducted application testing, debugging, and deployment to ensure the system met the operational requirements of the school.

- Developed web and Android application features for Ater Ater, a startup marketplace platform. Developed, tested, and optimized software to ensure it met both consumer and client requirements, maintaining a high standard of quality.
- Implemented core marketplace functionality including product catalog, product purchasing, shopping cart, checkout, and order creation.
- Contributed to frontend and application development based on project requirements and existing system architecture.
- Performed application testing and debugging to identify and resolve issues during development.
- Collaborated with the development team to ensure feature integration and application functionality worked as expected.

- Developed frontend components for the Sistem Persuratan Desa Pasirian, a web-based village correspondence management system. Developed the **backend** architecture using **Laravel**, focusing on scalability, security, and seamless integration with other services.
- Implemented user interfaces using **HTML, CSS, JavaScript, and Laravel** based on provided designs and application requirements.
- Developed responsive web pages to provide a consistent user experience across different screen sizes.
- Conducted frontend testing and debugging to identify and resolve interface-related issues.
- Collaborated with the development team during frontend and backend integration to ensure the application met user requirements.

EDUCATION

- 8/8 semesters, 3.71/4.0 GPA cumulative.
- Course: **PHP, Mysql, Android Studio, Java, Flutter, ERD, UI UX**
- Final Project: Development of a Gamified Library Information System for SMK Almunawwir IIBS

CERTIFICATIONS

- Junior Mobile Programming (BNSP)
- TOEIC score of 510

LANGUAGE

- **Bahasa Indonesia** — Native
- **English** — Intermediate

INTERESTS

- Building high-quality, scalable software products
- Learning modern frontend and mobile technologies
- Improving software engineering and problem-solving skills
- Following software engineering best practices and industry trends
